" THE SMALLEST AND LIGHTEST T.V. GAME IN THE WORLD ! "

CONNECTIONS & OPERATIONS: -

It is very easy to play with this item.

1. Simply connect, the 'SWITCH BOX' with TV as shown below:-

Connect to out-
door antenna of
T.V.

TO T.V.

Connect to TV.

Connect to antenna
rod.

(When you want to play Game than simply shift the button of
switch box towards 'GAME' position. If you wish to watch TV
than change the position of button towards 'ANTENNA' side.

ii. Fix the antenna rod in the console.

iii. Put 4 pcs of batteries (size 'AA') in.

iv. Turn the button of console to ' ON ' position.

That all !
Now you can play the most excisiting games with ease.

NOTE:-

a) After connecting all connections, please choose the right
   channel of your TV set & adjust the frequency of your TV
   set to watch with the console.

b) We have provided you with 'SWIVEL TYPE ANTENNA RODS'. To get
   the best performance and clear picture on TV, please adjust the
   length & direction of antennas.

OPTIONS:

1) This set is powered by 6V DC batteries.
   There is one 'DC' socket in the console and one can also use
   AC/DC adapter instead of batteries.
   AC/DC POWER ADAPTER IS OPTIONAL.

2) For one player, the joystick is built-on the console itself.
   But if second player wish to play on this console then there
   is one socket in this console. By simply connecting a normal
   joystick with this console, second player can also enjoy
   playing.
   THE ADDITIONAL JOYSTICK IS OPTIONAL.

3) This set is primarily designed for 'WIRELESS' functions.
   But if you are operating it in an area where too much
   'ELECTROMAGNETIC' disturbances are there then you might not
   get clear reception of TV picture. In such a case, there is
   option of using 'RF CONNECTING CABLE' for connecting the
   console with TV. SO THE RF CABLE IS OPTIONAL.

4) This item is available in 2 to 3 different kinds of colour
   combinations for your selection.
